- Batch printing, faxing, and e-mailing utilities automate and Streamline distribution business processes and speed your access to Information.

Health Care Today

Narrow margins and expanding costs are forcing health care providers to cut expenses so many are looking to technology to improve patient care while improving profitability. Technology, when applied intelligently, can simplify business processes, automating complex and time-consuming (expensive) business practices.

ScribeCare Solution

ScribeCare is proud to introduce its Enterprise Platform, a technologically-advanced patient information management system that uses cutting-edge web, database, and digital sound breakthroughs to improve medical documentation quality at cheaper prices than ever. For dictation, transcription, medical coding, reimbursements, or any other documentation problem, ScribeCare Enterprise Platform product can meet your needs.

Advantages

Using ScribeCare medical transcription product can cut your capital expenses and enlarge your qualified labor pool. And because it's adaptable, we can customize the system to integrate with your business processes and existing infrastructure. Faster turnaround times mean greater profitability and computerized consistency will lead to fewer rejections when seeking insurance reimbursement.

Security and Tracking

Administrators will enjoy the benefits of being able to easily track jobs in real-time online from any place with Internet access as well as being able to quickly compile business reporting data and statistics. And our HIPAA-compliant security standards and practices ensure that your patients' data is also kept confidential.
